Miller Environmental Group, Inc. TSDF in Buffalo Receives Approval

Miller Environmental Group's Buffalo, New York Treatment, Storage, and Disposal Facility (TSDF) receives its permit to accept oil and oily water as part of the Part360 solid waste permit and received additional approval for non-hazardous, non-regulated Industrial Liquid Waste. Rudy Streng, Miller CEO stated, "We are excited to announce that we have expanded our treatment capabilities with the opening of our Buffalo location. This facility complements the platform of our wastewater treatment network and further expands our ability to service our customers".

This location is a Permitted NYSDEC 360 Solid Waste Facility located in Western, NY and conveniently located just east of the Buffalo Metro Area in Lancaster, NY. Basic operations include waste treatment, waste storage, consolidation, transfer operations, and transportation to final disposal locations.

Miller Environmental Group, Inc. is a leading environmental services company with teams standing by 24/7, offering Industrial Services, Environmental Remediation, Emergency Response, Environmental Training and Compliance, Waste Transportation/Disposal, and more to clients of all sizes and in varying industries.
